

# BIOMATERIALS AND NANOMEDICINE POSITION

## UNIVERSITY OF SOUTHERN CALIFORNIA (USC)

The Chung Lab welcomes applications from candidate researchers at all levels (bachelors, masters, PhD, senior scientists) who are interested in pursuing research in the following areas:

- Nanomedicine
- Biomaterials
- Gene and Drug Delivery

Applicants should have a degree in Biomedical Engineering, Chemistry, Chemical Engineering, Pharmaceutical Sciences, or related areas. The position requires a highly motivated researcher with the ability to work collaboratively with other team members and manage interactions with faculty and a broad range of senior and junior research and clinical collaborators. Experience in nanomedicine/biomaterials, cell culture, and animal experience is not necessary but preferred. Candidates with relevant experience should email Professor Eun Ji Chung ([eunchung@usc.edu](mailto:eunchung@usc.edu)). Please include the following information with your email application: Cover letter, CV, references, and research interests.
